CHANDRU M

+91 6374469772 | mchandru8150@gmail.com | Portfolio | GitHub

Objective

Python Full Stack Developer with hands-on experience in developing web applications using Python, Django, MySQL, HTML, CSS, and JavaScript. Skilled in building responsive user interfaces, developing backend functionality, integrating APIs, and managing database-driven applications. Passionate about creating scalable, secure, and user-friendly web solutions while continuously improving technical skills.

Technical Skills

Programming Languages : Python , JavaScript
Backend: Django, REST API development
Frontend: HTML5, CSS3, Bootstrap, Tailwind CSS, React.js (familiar)
Database: MySQL, MongoDB (familiar)
Tools: Git, GitHub

Projects

Multi-layered Protection for Data Consistency and Regulatory Alignment – (SecureDataSystem)

Python, Django, MySQL, AES, HTML, CSS, JavaScript

- Developed a Django-based web application to securely manage sensitive data and documents.
- Implemented AES encryption to protect sensitive information and uploaded files.
- Designed secure document upload, storage, download and decryption workflows.
- Integrated user authentication, profile management, and user-specific data protection controls.
- Used MySQL for database management and Django ORM for handling application data.
- Developed a user-friendly dashboard with document management, notifications, and account settings.

Traffic Violation Prediction and Recognition Using Deep Learning

Python, Deep Learning, Computer Vision, CNN, Object Detection

- Developed a deep learning-based system to detect and recognize traffic violations using computer vision techniques.
- Implemented CNN and object detection models for vehicle and traffic violation recognition.
- Processed traffic images and videos to identify potential traffic rule violations.
- Evaluated model performance using accuracy, precision, recall, and F1-score.
- Contributed to intelligent traffic monitoring through automated violation detection.

SkyCast - weather App ***https://sky-cast-psi-teal.vercel.app/***

HTML, CSS, JavaScript, Weather API, Vercel

- Developed a responsive weather application to display real-time weather information.
- Integrated a weather API to retrieve current weather conditions based on city search.
- Implemented location-based weather updates and city search functionality.
- Displayed weather details including temperature, humidity, and wind speed.
- Designed a clean, user-friendly interface for accessing weather information.
- Deployed the application using Vercel.

Internship Experience

Full Stack Developer – Python Intern **July 2026 – October 2026**

Gradtwin Services (OPC) Private Limited

Multi-Layered Protection for Data Consistency and Regulatory Alignment (SecureDataSystem)

- Independently developed a full-stack web application using Python and Django.
- Implemented AES encryption for secure data storage and document protection.
- Integrated MySQL database and developed backend functionality using Django ORM.
- Built responsive user interfaces and implemented secure document management workflows.

Frontend Development Intern **February 2025**

Greensoft Group of Technology

- Completed a 15-day internship focused on frontend development.
- Gained practical exposure to developing responsive and user-friendly web interfaces.

Education

JJ college of Engineering and Technology	2022 - 2026
B.Tech Information Technology	*CGPA* - 8.1
Aurobindo Matric Hr. Sec School	*HSC* - 76.6
Aurobindo Matric Hr. Sec School	*SSLC* - 96

Certification

- Successfully completed the Python Development Internship at Gradtwin Services (OPC) Private Limited — *July 2026 – October 2026*
- Successfully completed the MERN Stack Development course at NOVITECH — January-2025

Conference

Presented the research paper titled **"Traffic Violation Prediction and Recognition Using Deep Learning"** at the Second International Conference on Recent Innovation in Technologies (ICRIT 2026), held in **April 2026.**
